

Question	Your answer:
Step 2: Domain Choice What domain did you choose to fine-tune the Meta Llama 2 7B model on? Choices: <ol style="list-style-type: none">1. Financial2. Healthcare3. IT	Financial
Step 3: Model Evaluation Section What was the response of the model to your domain-specific input in the model_evaluation.ipynb file?	The investment tests performed indicate > that the model is able to distinguish the two groups of subjects, although the performance of the model is not optimal. The results of the study are discussed in terms of the potential utility of the model in the detection of early stage Alzheimer's disease. KW - MRI KW- DTI
Step 4: Fine-Tuning Section After fine-tuning the model, what was the response of the model to your domain-specific input in the model_finetuning.ipynb file?	The investment tests performed indicate > that the investment is worthwhile.\n\nThe investment tests performed indicate that the investment is not worthwhile.\n\nThe investment tests performed indicate that the investment is worthwhile, but the expected returns are not high enough to make the investment worthwhile.\n\nThe investment tests performed indicate that the'
